PRESS STATEMENT - 3 NOVEMBER 1972

FEDERAL MEMBER TO VISIT LEIGH CREEK

Mr Bert Kelly, the Member for Wakefield will be in Leigh Creek again on Tuesday, 21st November, to meet Electors.

Last month he attended a Public Meeting in the Leigh Creek Theatre, where the future of television in remote areas was discussed with Mr Frank Brownless, the Engineer in Charge of Planning and Development from the Broadcasting Control Board, who travelled from Melbourne at Mr Kelly's request. Mr Kelly, a former Federal Minister, is a senior backbench Member and Chairman of the influential Public Works Committee. This Committee is charged with the responsibility to approving all Commonwealth Public Works in excess of \$750,000 and is representative of the three major Parties in both the Senate and the House of Representatives. In a Speech in Canberra last week Mr Kelly referred to the record number of Reports presented by the Committee in 1972. Mr Kelly said that there have been 78 reports and 180 meetings in the three years' work just completed by the Public Works Committee. WITH THE COMPLIMENTS OF SENATOR D S JESSOP

## CIVIL AVIATION

Senator JESSOP - I ask the Minister for Civil Aviation whether it is a fact that the major airline operators are finding it uneconomic to service intrastate routes in South Australia. Is he aware that in particular the service to Leigh Creek has been drastically reduced in recent months? In relation to Leigh Creek is the Minister aware that a third level airline would be able to provide a daily service? Will he give serious consideration to recommending that this line be taken over so that the residents will be given a much more satisfactory freight and passenger service?

Senator COTTON - I think it is a fair observation that in some of the internal flying in South Australia the load factors are not such as to make the operations all that profitable. In fact, some may be highly marginal. Where a service has to be dropped because the available aircraft and

the major operator are too big for the service, we always seek to encourage a third level operator to enter the field. I cannot direct that mandatorily but the honourable senator may be sure that we do what we can to help. We are watching the Leigh Creek situation closely in that regard.
