

LEIGH CREEK. 25th JANUARY, 1956.

Volume 1. Issue 18.

PRICE 1d.

On the evening of Friday, December 23, the Leigh Creek Swimming Pool was opened for public use. To herald the opening of the pool the weather turned cool for several days with fresh south winds. Nevertheless since opening, twenty-six sessions have been held including 7 special children's sessions made possible by voluntary attendants. The total number to have used the pool to date is 1,009 adults and 1,378 children, the largest number of people at any one session being 190 on Sunday, January 15.

With such large numbers of people using the pool it is necessary to keep the water pure, i.e., free from bacteria and slime. The common and most effective method of ridding the water of harmful bacteria is to add small quantities of chlorine, in this case 0.5 parts of chlorine to one million parts of water. This quantity is sufficient to kill all bacteria but is harmless to humans. At present the addition of this amount of chlorine is done by manually adding bleeching powder to the water. Growth of slime is at present being prevented by adding copper, in the form of copper sulphate, at the rate of one part per million.

In the near future automatic plant will be installed to dose the water with chlorine and copper. In this plant chlorine gas and copper filings will be used.

Additional plant also to be installed soon is filter plant which will rid the water of all suspended matter and make it clear. Included with this plant is special suction cleaning equipment which will be able to clean the bottom of the pool without pumping out the water.

Being built at the moment are the changerooms. These will consist of a central office and to left and right showers and toilets and changing areas for both sexes.

able cost and we will gain most pleasure and enjoyment from them if we treat the facilities and others using them with the respect they deserve.

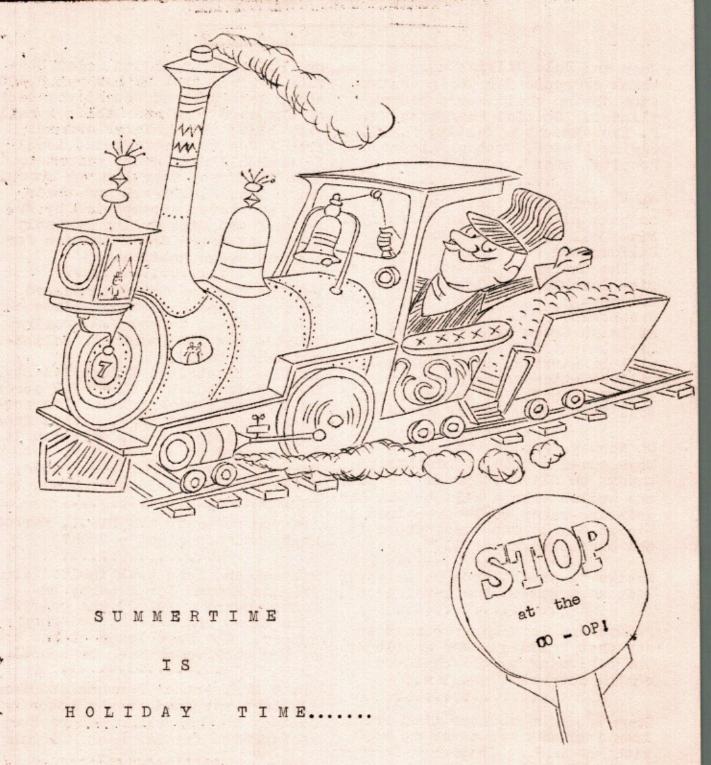

TO ERR IS HUMAN

How often we intend one thing and it turns into another! There is a joke in the Greek Anthology about a man who invented a stove that didn't work but served excellently as a wine cooler in summer. Eccentric "Lord" Timothy Dexter of Newburyport, Mass., sent a strange cargo of warming pans to the West Indies and made his fortune when the natives discovered that the long-handled pans were perfect for cooking in a hot climate. Columbus aimed at India and found America.

The same thing happens often in daily life. A job is lost which, if it had been taken, would have prevented the acceptance of a better one. The wrong book comes home from the library and opens a whole new field of interest.

It should take the edge off disappointment to remember that half the things that go wrong surprise us by turning out all right.

From "This Week."

COPLEY NEWS +

At a recent meeting of the Stockowners' Association of South Australia in Copley, the Mombers present were Mr. R.J. McAuley, Messrs. J.C.Hirsch, C.J.Frost, C.P.Edwards, R.F.B. Kerr, P. Tre-loar, R.V. Ragless, M.P. Sexton, P. Hoard and L.J. Kent (Sec.).

Discussions referred to association matters.

There was a great deal of discussion with regard to the new railway, and Members are still negotiating for improvement of trucking facilities.

At the close of the meeting, Mr. Kerr referred to representations made to him from Leigh Creek regarding support for a Rodeo to be held annually in aid of the

Flying Doctor Service.

The feeling of the meeting was that Station people already subscribe to the Service by annual subscription and meetings such as the Angepena Races, but that they would support any function given by Leigh Creek by attend-ance at such functions wherever possible.

Miss Janet Lewis, of the Copley Post Office left by air looking very smart, for several weeks holidays in 'the big smoke'. In her absence, Mr. Mert Lewis, Janet's father, has taken over the Post Office work.

************ Kath Cook returned to Copley last Monday from Hawker Hospital, where she had recently undergone a serious operation. Although Kath was her usual smiling self, she is not able to start work again for some time, so left by air on Wednesday night to stay with relatives at Mount Gambier.

The Leigh Creek Ambulance was called to Mount Serle Station on Tuesday to take Mr. Les Kent, the Manager, to hospital. Mr. Kent was taken ill suddenly, and his present condition is reported to be satisfactory. We hope to see him well again very soon.

Badges in aid of the Flying Doctor Corps are on sale at the Leigh Creek Bookshop priced at 2/-
